

BEDBUGS TREATMENT - PREVENTATIVE SPRAY

We have been contracted to provide a pesticide application for **Preventative Spray for Bedbugs**

We require access to your suite between the hours of **9 AM and 5 PM.**

As a precaution during the application of the pesticide, we require that you vacate your suite for **4 - 6 hours** from the time of application.

NOTE: If you are unable to accommodate this appointment, please contact your Property Management and/or Ecopest immediately. Ecopest is not responsible for any stains or damage that may occur.

For our service technicians to treat most effectively, we ask your co-operation in carrying out the following instructions:

1. In **all rooms**: Move all furniture at least 2 feet away from the walls so treatment can be applied to baseboard perimeters. Heavy wall units may remain, and we will work around them.
2. **Baseboards**: Remove only baseboards on walls adjacent to the affected suit.
3. Remove all clothing and items from floors and the bottom of closets (hanging can remain as long as they are not touching the floor). Place these items on the floor in the center of a room
4. In your living room: Move all furniture at least 2 feet away from the walls to enable treatment to be applied to baseboard perimeters. Heavy wall units may remain, and we will work around them. Couches and chairs must be accessible to technicians – do not cover with sheets or items. Remove clothing and items from the bottom of broom, storage, and linen closets and place these items in the center of a room. These items do not require covering over unless they contain dishes or food.
5. Birds and pets must be removed from the premises, and fish tanks (if any) must be covered and the motors turned off, to prevent any possibility of poisoning.
6. Children's toys should be placed in plastic bags or covered toy boxes. Unplug all cords from outlets, and cover TV's, computers, and other electronic items to prevent any spray from getting on them.
7. Unplug all cords from outlets, and cover TV's, computers, and other electronic items to prevent any spray from getting on them.

NOTE: Upon re-entry to your premises, **do not wash any of the baseboards. The pesticide has residual effects which would be lessened by washing.** Kitchen counter tops, cutting boards, fridge and stove tops should be washed prior to any items being returned to them. Vacuum after treatment especially along the baseboards, use crevice tool to get into corners and cracks. Regular vacuuming should be done because cleanliness and sanitation is a vital part of eradication and successful treatment.

Where pregnancies, allergies, illness or other unusual circumstances occur, occupants may wish to remain out of the premises for periods **longer** than those indicated above.

Tempo – PCP # 25673

Dragnet – PCP # 24175

Temprid – PCP #32524

Drione – PCP# 15255

Onguard – PCP# 31515

THANK YOU FOR YOUR CO-OPERATION
