

PHAROAH ANTS TREATMENT – BAIT APPLICATION

We have been contracted to provide a pesticide application for the control of **Pharaoh ants**.

We require access to your place between the hours of **9 AM and 5 PM**.

Due to nature of the treatment, there is **NO** need to evacuate the suites.

NOTE: If you are unable to accommodate this appointment, please contact your Property Management and/or Ecopest immediately. Ecopest is not responsible for any stains or damage that may occur.

For our service technicians to treat most effectively, we ask your co-operation in carrying out the following instructions:

In our on-going efforts to control the **Pharaoh ants** problem in the building, we will be carrying out a baiting and dusting application to all **plumbing plates plus all electrical outlets covers (both light switch and plug-in receptacles), to openings where the pipes come in under the kitchen and bathroom sinks, along kitchen counters, and in certain places in the cupboards**

1. All items (including food, toasters et al) must be removed from ALL cupboards in the kitchen, under the bathroom sink and on the kitchen counter. These items cannot be placed on the counter tops.
2. Bathtub plumbing inspection and repair plate must be taken off, if possible, as this would allow service technicians direct access to the main plumbing area.
3. **Please ensure that all of the mentioned plates are removed (especially by the kitchen and bathroom areas).**

The bait will be inserted in little plastic tubes or inside the receptacles. Plastic tubes placed strategically must not be removed or played with.

Note: No special cleanup is required on re-entry to your premises. **Do not wash or remove any of the bait tubes. Do not touch or ingest the dust applied.** Line the cupboards with non-adhesive paper before returning items to the cupboards and wipe down the kitchen and bathroom countertop – do not wash cupboards for 3 weeks.

In order to ensure an effective treatment please do not spray any insecticides. Maintain good sanitation practices (keep kitchen area very clean – do not leave any food or dirty dishes lying on the counter to attract the ants as this will make the bait ineffective.

Optigard – PCP # 30788

Maxforce Quantum – PCP #30513

THANK YOU FOR YOUR CO-OPERATION
